9-Weeks Camp

June 1 - June 5

Week 1 - Discovering Myself Super Me!

Get ready for an action-packed week of discovery, movement, and confidence-building as our elementary campers step into their own superhero story. Through exciting challenges, creative games, and team-based adventures, children will uncover the special strengths that make them unique. From testing their power in the Superpower Strength Challenge to solving the Giant Body Puzzle Race, becoming emotion detectives, and designing their own superhero identity, this theme invites campers to explore courage, self-awareness, resilience, and the power of working together. It is a celebration of the amazing abilities each child carries within.

Week 2 - My Family & My Story Where Do I Come From?

Week 2 invites elementary campers on a joyful journey through family, heritage, and connection as they explore the stories that make each family unique. Through meaningful activities such as creating a family tree, interviewing a family member, discovering cultural foods, and participating in a hands-on cooking project, children will celebrate traditions, share memories, and deepen their sense of identity and belonging. The excitement continues with a fun-filled water park field trip, adding adventure, laughter, and shared summer memories to the week. This theme nurtures curiosity, respect, and appreciation for the many ways families and stories come together.

June 8 - June 12

June 15 - June 19

Week 3 - My Home & Neighborhood The Place Where I Live

This week, campers will explore the meaning of home and discover how neighborhoods bring people, places, and community together. Through neighborhood mapping, a community scavenger hunt, and designing their dream house, children will build a stronger connection to the world around them while expressing their creativity and ideas. Campers will also create a 3D Neighborhood Model, helping them imagine how different spaces come together to form a community. As part of the week's special experiences, they will enjoy a visit to Cypress Cove Family Aquatic Park and cool off with Splash Quad Games: Water Relay Races. This exciting week encourages belonging, imagination, and joyful connection.

June 22- June 26

Week 4 - The Natural World Around Us

Our Local Ecosystem

Week 4 invites elementary campers to step outside, look closer, and discover the wonder of the world around us through hands-on exploration, outdoor adventure, and meaningful summer fun. From nature journaling and leaf and insect observation to building bird feeders and experimenting with soil and plants, children will deepen their curiosity about the natural world while learning to notice the beauty and detail all around them. A special field trip to a nature center will bring these discoveries to life, offering campers the chance to connect directly with the outdoors in an exciting and memorable way.

Week 5 - Water, Earth, & Sky

Our Planet

During this week of summer camp, children will explore Earth and its natural wonders through hands-on discovery and scientific investigation. They will conduct exciting volcano experiments, observe clouds, learn about the water cycle, and investigate rocks and minerals through collecting and classifying activities. Later in the week, this learning will be enriched by a special visit to the Lizzadro Museum of Lapidary Art, extending their curiosity and deepening their connection to the natural world.

June 29 - July 3

Week 6 - Cultures Around the World

People Live Differently Across The Globe

Week 6 takes elementary campers on a joyful journey through Cultures Around the World, where they will explore global traditions through hands-on experiences and playful discovery. Through passport craft, international games, world music and dance, flag design, and cooking, children will build curiosity, appreciation, and respect for the diversity of our world. The week will also include a fun field trip to Sky Zone Trampoline Park, adding movement, excitement, and memorable summer adventure.

July 6 - July 10

July 13 - July 17

Week 7 - Inventions & Human Creativity

How People Solve Problems

During this exciting week at summer camp, children explore simple machines such as levers, pulleys, and gears through fun, hands-on experiments, discovering how they are used in everyday life.

They collaborate in a Build-a-Bridge Challenge, strengthening teamwork and problem-solving skills while designing creative and sturdy structures.

Campers also step into the role of young inventors, creating their own useful tools and bringing their ideas to life.

The week wraps up with an engaging introduction to coding and robotics, where children explore basic concepts through interactive activities, sparking curiosity and a growing passion for innovation.

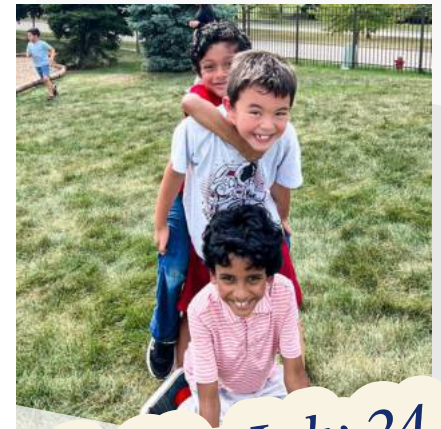

Week 8 - Helpers In Our Community

People Who Serve Others

During this meaningful week at summer camp, children explore community jobs through fun role-play activities, learning about different professions and the importance of helping others.

They express kindness and gratitude by creating thoughtful thank-you cards, developing creativity and emotional awareness. Campers also work together to plan a small service project, encouraging teamwork, responsibility, and a sense of community.

This week helps children understand the value of giving back and being active, caring members of their community.

July 20 - July 24

July 27 - July 31

Week 9 - Making a Difference

How Can I Contribute To My World?

This impactful week at summer camp, children learn to identify community needs and understand how they can make a positive difference.

They work together to plan a group service project, building teamwork, responsibility, and leadership skills. Through fun leadership games, campers develop confidence, communication, and collaboration.

The week concludes with a reflection circle, giving children the opportunity to share their thoughts, experiences, and what they learn about helping others.
